

WHAT DO EDUCATION LEADERS THINK?

Bill Cooper, Director of Guidance
Smyrna High School

Smyrna, Delaware

“Education Transfer provides the expertise, experience and manpower every step of the way necessary for a very successful Career Café for the past 6 years for our 9th graders”

John Dirr, Principal
Seaford Middle School

Seaford, Long Island

"We feel that our students came away from their Career Forum sessions with an understanding of what general skills are important to be successful in any given career. We feel that the students also came away with an appreciation of what makes a person successful.. They also learned that there may be different routes for attaining success in life and in chosen careers "

"This was the first year that we had a Career Forum Day, and after observing what transpired during the panel sessions and post-panel surveying of both host teachers and student participants, we know that the students have gained meaningful insights into career choices by participating in this project."

Denise B. Kenney, Assistant Director
Marist College Liberty Partnerships Program

Poughkeepsie, New York

"The atmosphere was relaxed and provided the students with a lively and spontaneous exchange. The panelists spoke not only of their jobs but also shared personal experiences with the students."

"I felt that this program was extremely beneficial to the Liberty students and would highly recommend it for other community groups."

Mark Villanti, Director of Guidance
Roosevelt High school

Hyde Park, New York

"We are so impressed with the caliber of speakers who have volunteered their time."

"I would like to express special thanks to David Bailey of Education Transfer for all the time and effort he has made coordinating our classroom presentations."
